Photoshop	Inkscape		

EXPERIENCES

GetInsured.com   San Francisco, CA
Front-End / UI Developer   February 2014 – Current
- As a front-end developer at GetInsured.com I took part in rapid prototyping and building AngularJS applications for multiple healthcare state exchanges.
- The main project that I spearheaded was an Angular application for three states that allowed users to edit their household information for healthcare eligibility.
- I took park in agile development, daily scrums, and collaborated with other members of product development team.

General Assemb.ly   San Francisco, CA
Web Development Immersive Student   September 2013 – December 2013
- During General Assembly's Web Development Immersive program I built several Sinatra and Ruby on Rails applications and implemented a variety of APIs and libraries.

Bainco International Investors   Boston, MA
Executive Assistant to the CEO and President   August 2012 – August 2013
- As an Executive Assistant, I organized meetings for the CEO and partners, managed corporate and personal expenditures by the CEO, and coordinated travel itineraries. Additionally, I coordinated logistics with clients for transfers of funds, completed legal documents, and monitored Bainco's custodian bank to ensure wires are processed appropriately, and I was responsible for creating marketing and proposal materials for prospective clients.
